

KNOWLEDGELAKE CONNECT

SharePoint Integration for Any Desktop Application

To leverage the full power of SharePoint, organizations need to be able to store all related content in the same repository, and all documents need to be searchable using consistent metadata.

Production-level capture tools like KnowledgeLake Capture fulfill this need for mission-critical transactional documents. For other content that is saved on an ad-hoc basis - such as PDF files and e-mail messages - KnowledgeLake Connect enables all users in your organization to easily and accurately index documents from any desktop application, and then save these documents to a SharePoint document library.

KnowledgeLake Connect also provides integration to line of business applications, providing the ability to scan, index and search using your line of business application.

“KnowledgeLake’s adoption of Office SharePoint Server 2007 as a competitive ECM platform for its new document imaging

solution provides customers with yet another way to get a complete Office SharePoint Server-based solution.”

Jeff Teper
Corporate Vice President
Microsoft Office SharePoint Server Group

KEY FEATURES

ONE CLICK TO YOUR LINE OF BUSINESS APPLICATION

Integrate into most Web, Windows, Silverlight and WPF applications that manage your business functions.

- One click to scanning with any line of business application
- One click to auto-index using your line of business application data
- One click to a SharePoint search from any line of business application

ADDING DOCUMENTS TO THE CONNECT CACHE

Help users with any level of knowledge correctly and easily add documents in whatever way is most convenient for them.

- Multiple methods of adding documents
 - Use “Save as” or “Send to” option from any desktop application
 - Dragging and dropping files into Connect
- Ability to create batches, allowing users to assign recurring indexing values to multiple documents
- Full integration with Outlook 2007 for easily saving messages

INDEXING DOCUMENTS

Ensure that documents released from Connect can be searched in a uniform way alongside all other documents in your SharePoint library.

- Tight integration with SharePoint, exposing designated SharePoint libraries and columns for indexing
- Easy to use, custom prompts to ensure that all users correctly tag documents with appropriate metadata

TECHNICAL HIGHLIGHTS

- One click integration into your line of business application
- Save documents to SharePoint from any desktop application on any PC with a web connection
- Streamline the process of saving documents, because edits made to documents stored in the SharePoint library are automatically saved
- Quickly browse to any SharePoint document library from Connect
- Securely store credentials for all the SharePoint servers you access
- Perform simple desktop scanning and saving of documents to SharePoint
- Use SharePoint column definitions to ensure proper metadata association

SAVE DOCUMENTS TO SHAREPOINT

Increased productivity by saving documents to SharePoint in a few simple steps.

- Can be used with native SharePoint or with KnowledgeLake Imaging for SharePoint
- Edits made to a document can be automatically saved back to SharePoint
- Ability for users to save any document (from the desktop) to the SharePoint site or server of their choice

SYSTEM REQUIREMENTS

DESKTOP SOFTWARE

- Microsoft Windows Vista 32-bit or 64-bit or Vista Service Pack 1
- Microsoft Windows XP Professional + Service Pack 2 or greater
- Microsoft Windows 2000 Professional + Service Pack 4 or greater
- Microsoft .Net Framework 2.0

DESKTOP HARDWARE

- 500 megahertz (MHz) processor or higher (1 GHz required for Vista)
- 256 megabyte (MB) RAM (1 GB required for Vista)
- 10 megabyte (MB) hard disk space + space for documents to be cached
- 800x600 or higher display resolution

SUPPORTED SERVERS

- Microsoft Windows SharePoint Services 2.0 or greater (WSS)
- Microsoft Office SharePoint Server 2007 (MOSS)
- Microsoft Windows SharePoint Portal Server 2003 (SPS)
- Microsoft Office Live

Note: KnowledgeLake Connect does not install on the server, it is a desktop application only.

The KnowledgeLake Family of Imaging and Capture Products

From the desktop to the enterprise, KnowledgeLake products allow you to complete your enterprise content management solution in order to maximize your SharePoint investment. As a result, your organization can increase productivity, improve collaboration and reduce the total cost of document management. Use any of the KnowledgeLake products together, on their own or with your existing solutions.
